"The Politicians in our city have come to believe that the people of Newark exist to provide them with power and position for their personal luxury, I believe their power and position exist to provide the people of Newark with more freedoms and democracy to improve the quality of their lives."

- Ras Baraka

## Ras and Héctor on:

**Education:** We will fight for smaller class sizes, more teachers, and advanced coursework. Local universities need to be made more responsible to the district by helping to prepare our students for the seats that

they should guarantee our children. Make sure the public reviews the plans for the construction of new schools.

**Crime:** Work with the administration to establish police visibility in our communities, and work creatively and pro-actively with community residents to combat issues such as gang recruitment and car theft

**Employment:** While there were a mere 1,000 jobs available for our youth this summer, we watched the tragedy of car thefts and gang recruitment. Newark's Renaissance must translate into more jobs for city residents. Employment not only provides income and keeps our kids out of trouble, but it gives dignity as well.
